

# YOUR SOLUTION for Consistent, Cost Effective STAFF TRAINING

[www.JumpstartYourOffice.com](http://www.JumpstartYourOffice.com)

Jumpstart is a complete training solution and provides **PROFESSIONAL OPTICAL PRACTICES WITH A CONSISTENT, UNBIASED TRAINING RESOURCE TOOL** for staff members. Sponsored by Global Optics, this interactive CD-ROM training series is exclusively available from your independent optical laboratory.

## ABO APPROVED

Approved by the American Board of Opticianry, Jumpstart is an unbiased training resource tool for both veteran opticians and inexperienced beginners. At the end of training, each disc of the Jumpstart training series is equipped with a comprehensive examination. Participants who earn a passing score of 80% or better may redeem their certificates for ABO continuing education credits. Each of the Jumpstart training discs are approved by the American Board of Opticianry for four (4) hours of continuing education credits.

## TRAINING VIDEOS

Each disc of the Jumpstart training series includes video, animation, music and voice-over narration to provide the most comprehensive learning experience. Adjustable volume and music controls enable the participant to customize their learning experience.

## INTERACTIVE QUIZZES

At the end of each section, an interactive quiz will assist the optical professional in reviewing the material covered. A short series of multiple choice and yes or no questions will be used to review the material of each section. If an incorrect answer is chosen, the program assists the optical professional by providing the correct answer and the reason their selected answer was incorrect.

## DETAILED RESULT REPORTING

Upon completion of each Jumpstart training disc, the participant may elect to complete a comprehensive examination reviewing the training material. The completed exam is scored and a detailed report of the participant's performance is provided. The detailed report breaks the test materials down by each training section on the disc and assigns a percentage to the participant's performance. Detailed result reporting provides the participant with helpful information on which areas to review and focus on for improvement.

### DISC 1: JUMPSTART YOUR OFFICE

Disc One of the Jumpstart training series provides staff members with an introduction to working in an optical environment. Upon the completion of Disc One: Jumpstart Your Office, staff members will have a firm foundation of optical knowledge required to provide the best patient care.

### DISC 4: IDENTIFYING FRAME LIMITATIONS

Disc Four of the Jumpstart training series is designed to illustrate various aspects of a patient's prescription and how their prescription may affect their frame choice. Training topics include detailed information on frame and facial measurements, frame materials and styles, how to deal with challenging prescriptions and strategies for dispensing new eyewear.

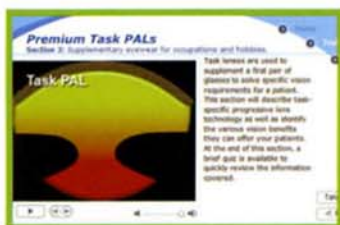

### DISC 2: PROGRESSIVE LENS TECHNOLOGY

Disc Two of the Jumpstart training series provides staff members with in-depth information about progressive lens technology and the benefits of dispensing premium progressive addition lenses (PALs) in an optical office. Staff members will interactively learn about PAL lens features and how they affect a patient's vision.

### DISC 5: WARRANTIES & REMAKES

Disc Five of the Jumpstart training series provides training for optical professionals on how poor warranty and remake policies can damage a practice. This disc gives your staff the knowledge necessary to create successful policies for your practice to increase your patient's satisfaction and confidence in their eyewear purchase.

### DISC 3: IDENTIFYING VISUAL NEEDS

Disc Three of the Jumpstart training series provides staff members with extensive information on how to increase practice sales by implementing a total vision care approach and successfully recommending supplemental eyewear. Interactive training will illustrate how supplemental eyewear helps to better satisfy patient vision requirements.

### DISC 6: UNDERSTANDING DIGITAL LENSES

Disc Six of the Jumpstart training series provides in-depth information on digital lens technology and how it differs from conventional lens technology and processing. Training includes a basic understanding of digital lenses including design, processing, pricing and dispensing recommendations.

To learn more about the [Jumpstart training series](#), or to obtain a copy for your practice, please contact your independent optical laboratory.
